

n8n Beginner Training Notes

What is n8n?

n8n is a workflow automation platform that connects apps and automates repetitive tasks using nodes.

Core Concepts

Workflow: automation. Node: single step. Trigger: starts workflow. Credentials: secure app connections. Expressions: dynamic values like `{{$.json.name}}`.

Essential Nodes

Manual Trigger, Schedule Trigger, Webhook, HTTP Request, Set, Code, IF, Switch, Merge, Filter, Split In Batches, Edit Fields, Gmail, Slack, Google Sheets, Respond to Webhook.

Example Workflow

Lead Form -> Webhook -> Set -> IF(valid email) -> Google Sheets -> Gmail confirmation -> Slack notification.

Practice Exercises

1. Daily scheduled email. 2. Read CSV and send Slack messages. 3. Fetch weather API and store in Sheets. 4. AI chatbot using HTTP Request.

Best Practices

Use meaningful node names, test incrementally, use error workflows, store credentials securely, log outputs.
